

Have Your Say: East Haven Village Questionnaire 2018

Thank you to everybody who completed and returned the recent questionnaire from East Haven Together. You will remember that every household was given the opportunity to put forward their views about the future sustainability of the village. These were then summarised into 12 key statements for further consultation. In total, 31 questionnaires were returned out of a possible 49 households which represents a 63% return rate. The responses are noted below for your interest and provide a clear guide as to the priorities of people currently living in the village. Some people asked questions on their return form such as, “how would a particular initiative be organised or funded?” As with all our activities and achievements over the past five years any project will be dependent on successful grant funding and the ability of East Haven Together to ensure completion. We can’t promise anything at this stage but we are now in a position to act quickly if an opportunity to progress a project or apply for grant funding presents itself.

1 It is important to keep the beach and local environment as clean and litter free as possible.

Strongly Disagree	Disagree	Neither Agree or Disagree	Agree	Strongly Agree
			9 (29%)	22 (71%)
