Energy and Environment

Languages

LINGUAS offers English, German, Spanish courses up to the highest academic level C2 and ESP.

LINGUAS teaches all the International Language Levels of English and German and **ESP and preparation for standardised language tests like TOEFL Examination, IELTS, Cambridge Certificate, TOEIC, UBELT, CELBAN or OSD for German.**

Our Head of Department is Professor at the University of Applied Sciences of Technology (University of Applied Sciences Technikum Wien) and our Language Dept. is highly capable of English for Technology (ESP) and the preparation for TOEFL which is the most world-wide acknowledged examination for English for studies in all fields of academic research including technology as well as other exams stated above.

Soft Skills

LINGUAS offers courses on Soft Skills (Business Coaching, Management, Communication, Leadership etc.) by academically trained personnel and lecturers.

This will open up an interesting scope of activities directly at the pulse of the companies. The training stays abreast of changes in the workfield and environment of production and is new in the branch. Endowed with your new competences as a process specialist you will be able to represent the criteria of sustainability in the technologies in question in society with secure argumentation.

Energy and Environment

The global energy demand rises rapidly. Renewable energy resources, regenerative energies and higher efficiency are the motors of the future.

Training and continuing education in the fields of energy efficiency and renewable energies are numerous.

- Renewable energy
- Technology of power plants
- Energy industry
- Energy and environment
- Power network and energy reservoirs
- Energy management and digitalization

By means of our offer we cover the information needs of local companies on issues of supply of electricity, gas, heat and water as well as waste water and waste management and city cleaning and telecommunication.

We supply you with basic knowledge and the framework as well as methods and specialist courses.

LINGUAS education center offers an education corresponding to the needs of nowadays society in economy and ecology .

As a process specialist you will be amidst all operational processes and can be hired and engaged in production companies and service companies.

LINGUAS analyses issues of companies and finds the right partners from its network.

Seminars

In seminars people can gain new, practice-oriented knowledge within short time. Participants profit from the exchange of experience with like-minded people and with scientifically competent lecturers. LINGUAS Education Center offers periodic seminars on specific topics.

The seminar series is directed to qualified personnel and managers from industrial companies, business enterprises and service companies, energy suppliers, counselling centers, consultants and administration.
