FAQS

Renewable Energy (future glory of the region)

Lesotho produces 80 megawatts of electricity and the demand in winter goes as high as 120 megawatts. Opportunities lie in the generation of solar energy, wind energy and hydro power to generate electricity and meet the current supply gap. Excess power can be sold to neighbouring countries.

Solar energy

In regard to solar energy, the Lesotho Energy Master Plan estimated solar energy at an annual average of 7,520 MJ/m² per day on horizontal surface. As part...

HYDRO POWER

The Lesotho Highlands Water project offers opportunities for mid to large scale hydropower development.

Several studies have been conducted on possible pumped-storage plants as well.

It is estimated that the large-scale hydropower generation potential for Lesotho is approximately 450 MW.
